## Main features

- A piece of Art with the resin case
- Compact Design
- Universal COIL inside, replace the coil and keep the sleeve

## Specification

**Dimension:** 22 x 123.8 mm

**Capacity:** 2 ml

**Battery:** 1500mAh Built In

Galaxy One is an All-In-One piece that is sleek in design with a 2ml e-liquid capacity while maintaining the smooth airflow. It adopts the ECO Universal Coil(EUC) so that you only need to replace the ceramic coil head (EUC Head) inside without changing the metal sleeve (EUC Sleeve) that is truly ECO friendly and makes vaping more affordable. Built with CCELL ceramic coil inside, it is guaranteed to deliver the most original flavor of your juice. Its compact design makes it easy to carry around, while its 1500mAh built in battery is efficient and powerful.

Galaxy One, Out of This World!

## How to Use

**1.Switch On/Off:** Press the fire button 5 times in quick succession within 2 seconds to turn the device on. In the same way, the device will be powered off after 5 presses.

**2.Vaping:** Hold the fire button and inhale through the mouthpiece. Release the fire button and exhale.

**3 Adjustment of Air Flow:** To adjust the airflow simply twist slightly the top lid without loosening its grip on the chamber and decide to your preference

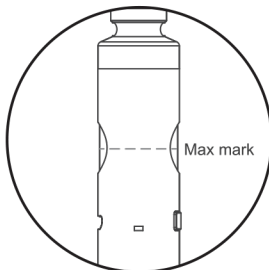

### 4. Filling E-liquid:

The tank is an easy top fill and the lid can be removed to uncover the all-around filling chamber. Please do not overfill, which you could refer to the Max Mark shown.

### 5. Changing Atomizer:

To change the atomizer from the top, simply twist open the lid clockwise and remove it. Take the atomizer out of the chamber and remove the EUC lower Sleeve. Replace the EUC inside with a new one and put the EUC lower sleeve back. Place the atomizer into the chamber and twist back the top lid. Make sure the EUC is installed in the right direction.

**6.Charging:** Simply charge the VECO ONE by connecting it with a computer or a wall adapter via USB cable. When it's fully charged, the button light will go out.

Max mark, Do not overfill

## Function:

Short Circuit Protection:

1.When the short circuit occurs before working, the button light flashes for 5 times and there will be no output power.

2.Low Wattage Protection

When the battery voltage is lower than 3V, the fire button light flashes for 3 times and the battery will be locked.

3.Over Vaping Protection

When the fire button is pressed for more than 10 seconds, the light flashes 3 times then goes off. The battery will be locked.

4.Low Battery Protection

When the battery is less than 10%, the light will flashes till it goes off completely.

## Note:

1.Please power-off the Galaxy One when not in use.

2.Do not press the button if the Galaxy One is not in use.

3.Only have your Galaxy One repaired by Vaporesso. Do NOT attempt to repair it on your own as it may lead to further damage to the item and/or personal injury.

## Caution

1.The device is intended for usage by people over 18, NOT by non-smokers, children, pregnant or breastfeeding women, people with or at risk of heart disease, or people taking medication for depression or asthma. The electronic cigarette is not a smoking cessation device.

2.Please keep this unit out of reach of children or pets;

3.Please don't drop, throw or abuse your device, it may cause damage;

4.Please keep the battery dry;

5.Do not place it in extremely temperatures;

6.Do not try to disassemble the battery;

7.This device does not mean to be used as a nicotine replacement therapy for smoking cessation.
