Vulpes RDTA Vape Sly! User Manual

Thank you for choosing Revenant Vape Products!

Vulpes RDTA

The Vulpes RDTA is the answer to a perfect feed-loop. As the name would suggest, we took it to a whole new level with this Vulpes RTDA by giving it the deck this model deserves: A horizontal two-post structure to keep your build steady and low, close to the source. Our Vulpes RDTA has been designed with the purpose of being sturdy and stable guaranteeing a clear reading and a consistent output.

Its look is simple but its functions are more than ideal: adapting to your double or single builds simply by orienting the removable cover-sleeve to match the airflow holes for best performance. The Vulpes RDTA comes with a steady screw-in large delrin drip-tip but it also provides a ring adapter to fit any of your preferred 510s.

Vulpes RDTA, Vape Sly!

Please visit www.revenantvape.com for more information.

Main Features:

- ⊙ Rebuildable Deck
- ⊙ Large liquid stock
- ⊙ Comfortable adaptable mouthpiece
- ⊙ Horizontal Two-Post Structure for single or double builds Flexible Air Flow
- ⊙ Fully Visual Tank Derlin Dip Tip with 510 ring adapter

Package include:

- 1 x Vulpes RDTA
- 1 x Spare glass and parts

Specification:

Vulpes RDTA

Dimension:48.7x22mm

Capacity: 3ml

How to Use:

Make your build on the 2 post deck, mind the resistance and the accuracy. Feed the preferred type of wick through the loop of your coils and stuff the two ends into their respective holes once the tank is filled. Once set up, remember to properly prime your wick before use.

Adjustment of Air Flow

The airflow slits can be adjusted to lager and smaller and also specifically set for a single coil build when preferred.

Warning:

- 1.When using a new atomizer, after filling in e-liquid, let the tank stand for 2 minutes, so the coil can be saturated with juice before firing
- 2.The object may become extremely hot if used improperly!
- 3.Do not fire without fully assembling the atomizer
- 4.Refill the tank before the tank becomes completely empty in order to avoid dry burnt or damage to the atomizer
- 5.Keep it out of reach of children and pet
